

Cleantec TwinPac 930-2

The Cleantec Twinpac 930-2 is a totally practical professional carpet maintenance system combining all the merits of high performance and deep extraction with a unique simplicity of operation.

The original design feature of the Twinpac 930 features 30-litres of high pressure cleaning solution and 30-litres of twin-motored pick-up capacity, split into two self-contained units connected only by the dual, quick connect, 10-metre power cable and solution tube.

The Twinpac accessory kit includes our widetrac twin jet spray extraction nozzle and separate upholstery hand tool, allowing the full range of extraction operations.

Two separate units, easy to fill, easy to empty, easy to operate but able to be used independently as required.

The Cleantec Twinpac 930-2 allows you to:-

- (1) Pre-vacuum the carpets before extraction - Essential
- (2) Deep extraction clean the carpets - High powered operation
- (3) Post "Air Groom" vacuum the carpets when dry - Removes any residue and looks great

The TPD-930 machine is a full twin-motored independent wet or dry machine which, when equipped with Kit BB50, provides full wet and dry facilities.

The TPD-930 System

Power	Pressure	Flow	Range	Weight	Dimensions
230V AC 50/60Hz	58psi/ 4 bar	2L/Min	10.0m	12.5Kg	415 x 415 x 630mm

Motor	Power	Airflow	Suction	Capacity	Range	Weight	Dimensions
2400W	230V AC 50/60Hz	80 L/sec	2500mm	30L	26.8m	30.9Kg	720 x 490 x 880mm

Also available 115V/120V specification.
